Federal Communications Commission
Office of the Secretary

Federal Communications Commission
445 12th Street SW
Washington, DC 20554

Dear Federal Communications Commission,

The iPhone has set the stage for the future of mobile Internet
-- but bad policies allow companies like AT&T and Verizon to
shackle great gadgets to their closed networks.

To free wireless Internet, the FCC and Congress must use our
public spectrum to create an open network that gives consumers:

1. The freedom to use whatever device we want on any network.
2. The freedom to choose among many providers in a competitive
wholesale marketplace.
3. The freedom to access any content or services we want through
our devices.

These true open access standards should apply to the entire
wireless market.

Sincerely,

Frank Taylor
1317 Alewife Circle
South Yarmouth, MA 02601-6105

Dear Federal Communications Commission,

This is a big one, what Apple and AT&T are doing right now is telling law abiding consumers that regardless of what carrier they choose, their very expensive phone is subject to corporate hackers that will permanently disable the property of the consumer if that consumer chooses another network. Tell Apple, AT&T, and the entire Cellular industry that it is illegal to purposefully destroy private property.

The iPhone has set the stage for the future of mobile Internet -- but bad policies allow companies like AT&T and Verizon to shackle great gadgets to their closed networks.

To free wireless Internet, the FCC and Congress must use our public spectrum to create an open network that gives consumers:
